PROBES

Item #	Product Description
270005	ORP Probe
270006	pH Probe

PROBE HOLDER ASSEMBLY

- 1) A Probe Holder is included with each probe.
- 2) The Probe Holder includes four parts.
 - a. Two Probe Holder Clips (adjustable)
 - b. "L" Mounting Bracket
 - c. Mounting Tab (adjustable)
- 3) Attach the Mounting Tab to the "L" Mounting Bracket creating a U shape with the two parts.

- 4) Slide one of the Probe Holder Clips onto the "L" Mounting Bracket, so that it extends past the top of the "L" Mounting Bracket.

- 5) Slide the second Probe Holder Clip onto the bottom of the "L" Mounting Bracket. This will create the widest support for the Probe.

- 6) Attach Probe to Probe Holder.

TIP: DO NOT USE abrasive cleaners, sponges, scouring pads or hazardous chemicals to clean the Probe

PROBE CLEANING

To ensure Probe accuracy, it is recommended that the Probe be cleaned at least every three months. Minerals, algae and slime found naturally in the aquarium will build-up on the Probe over time. The Probe will not measure accurately with this build-up. Cleaning the Probe will remove the debris and prolong its life.

- 1) Disconnect the Probe from the Controller and unplug the Controller until cleaning is completed.
- 2) Place the Probe to be cleaned into a stable cup with either full strength Lemon Juice or White Vinegar (both are weak acids).
- 3) Allow the Probe to soak for 5 – 10 minutes.
- 4) Remove the Probe from the cup and wet a cotton swab with the Lemon Juice or Vinegar and gently wipe the Probe with the swab. Gently remove the hardened materials that have built-up on the Probe.
- 5) Attach the Probe to the Controller and power on the Controller.
- 6) For accuracy, recalibrate the Probe after cleaning.

TIP: Probes should be replaced every 12 to 18 months.

pH PROBE CALIBRATION

pH Probes should be calibrated every four to six weeks. Clean Probes prior to calibration. Refer to the Probe Cleaning information above for details. Refer to pH Probe Calibration on page 10 for calibration steps.
